

Plant Therapy Releases ‘Diffuse On The Move’ - a Portable Travel Diffuser

Aromatherapy on the go has never been so easy; this essential oil mobile diffuser plugs into any USB or 12V port.

TWIN FALLS, Idaho ([PRWEB](#)) November 16, 2017 -- Plant Therapy, a leader in the aromatherapy industry, announced the release of a new [portable travel diffuser](#) that allows users to diffuse their favorite essential oils in their car, from their computer, and anywhere else they can find a USB or 12V port.

Named “Diffuse On The Move,” this new product is the result of Plant Therapy’s customer-focused approach. “Taking aromatherapy on the road has never been easier,” said Chris Jones, President of Plant Therapy. “Our customers have been asking for a compact essential oil diffuser they can take with them - whether venturing abroad or just traveling around town - so we developed this portable diffuser to fill that need.”

“Diffuse On The Move” plugs into any USB or 12V port and uses atomizing technology to disperse essential oil particles into the air using pressurized cold air. This type of mobile essential oil diffuser uses no heat, water, or carrier oils, which means customers are getting the most out of their essential oils.

The portable diffuser comes with a 12V car adapter and an extra oil bottle. Additional bottles are also available for purchase, allowing users to take several favorite oils wherever they go.

About Plant Therapy

Founded in 2011, Plant Therapy is a leading supplier of essential oils and accessories. Based in Twin Falls, Idaho, we provide the absolute highest-quality essential oils and are committed to educating our customers on their uses, safety and efficacy.
