Copaiba Oleoresin

**Product Details**![](Copaiba_Oleoresin.jpg)

**Botanical Name:** *Copaifera officinalis*
**Countries of Origin:** El Salvador & Brazil
**Extraction Method:** Tree Tapping
**Plant Part:** Balsam From Tree
**Strength of Aroma:** Light
**Cautions:** None Known
**KidSafe:** Yes

**Description**
Copaiba Oleoresin is an incredibly smooth and gentle oleoresin, which does less damage to the trees, and contains more therapeutic compounds than the distilled oil. Unlike most other oleoresins, this one is oil soluble! Copaiba Oleoresin has a sweet, smooth scent that is earthy with a slight balsamic note. It can be used for easing achy joints and sore muscles associated with normal aging or wear and tear. The warming capabilities of Copaiba Oleoresin makes it a wonderful addition to support respiratory health and relieving occasional digestive upset.

**Directions**
Add 2 drops of Copaiba Oleoresin and 2 drops of Frankincense Serrata to 1 tsp of your favorite Plant Therapy carrier oil, then massage onto your aching joints and/or muscles. If you need relief from digestive upset, add 3 drops Copaiba Oleoresin to 1 tsp of your favorite carrier oil and massage in a clockwise direction on your abdomen. To make a soothing chest rub, blend 1 drop each of Copaiba Oleoresin, Black Pepper, and Coriander to 1-2 tsp of a carrier oil or lotion.

**Blends Well With**
Bergamot, Black Pepper, Chamomile Roman, Cedarwood Himalayan, Frankincense Serrata, Jasmine Absolute, Lavender, Orange Sweet, Sandalwood Australian, and Ylang Ylang Complete.
