Product Details

Botanical Name: *Dracocephalum moldavica*

Country of Origin: Bulgaria

Extraction Method: Steam Distilled

Plant Part: Leaves, Flowering Tops

Strength of Aroma: Medium

Cautions: Use topically at a maximum of 1.7%

KidSafe: No

Description

Moldavian Dragonhead Essential Oil comes from the beautiful Moldavian Dragonhead plant, which produces vibrant purplish-blue flowers and a slight lemon scent. It is similar to Melissa (Lemon Balm) Essential Oil, but has a more unique chemistry. Due to its low yield, Moldavian Dragonhead is more costly than the average essential oil, but well worth the investment. This rare oil offers many benefits, including helping to reduce digestive upset, boosting the immune system, fighting against seasonal threats, and relieving symptoms of restlessness.

Directions

Difuse 6-8 drops of Moldavian Dragonhead in your Plant Therapy Aromafuse diffuser or in a personal inhaler to help boost immune support or reduce restlessness. Blend 1-2 drops of Moldavian Dragonhead and 1 drop of Turmeric CO2 in a teaspoon of your favorite Plant Therapy carrier oil and massage on the abdomen in a clockwise motion to relieve stomach upset and aid digestion. We recommend a maximum dilution of 1.7% for topical applications.

Blends Well With

Basil Linalool, Bergamot, Cedarwood (all), Citronella, Geranium Egyptian, Grapefruit Pink, Jasmine Absolute, Lavender, Lemon, May Chang, Orange (both), Petitgrain, and Turmeric CO2.
